Director's Remuneration

The Board of Directors has approved Director's Remuneration policy. The main features of the policy are as follows:

- The Company shall not pay remuneration to its non-executive directors including independent directors except for meeting fee for attending Board and its Committees meetings.
- The company will reimburse or incur expenses of travelling and accommodation of directors in relation to attending of Board and its Committees meetings.
- The Director's Remuneration policy will be reviewed and approved by the Board of Directors from time to time.

Future Outlook

The future outlook of textiles business in Pakistan has become uncertain. Large increase in interest costs (KIBOR has increased from 7% in July 2021 to 12.25% at present), energy costs (gas prices increased from \$6.50/MMBtu to \$9/MMBtu), freight charges etc. has increased cost of manufacturing sharply. This is happening at a time when demand for textile goods is slowing down due to loss of disposable income of consumers in western countries (as a result of high inflation in fuel, rent and food costs). As a result it is difficult for textile companies to pass on the increased cost of manufacturing.

Your Company faces similar headwinds. As a result, your management expects margins and profits to reduce going forward.

Management and Labor Relations

The relations between the workers and management remained cordial throughout the period. Your Directors wish to thank all workers and staff members for their hard work.

For and on the behalf of the Board of Directors.

20 Fair value measurement of financial instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Underlying the definition of fair value is the presumption that the company is a going concern and there is no intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms

A financial instrument is regarded as quoted in an active market if quoted price is readily and regularly available from an exchange dealer, broker, industry Company, pricing service, or regulatory agency, and that price represents actual and regularly occurring market transactions on an arm's length basis.

measurements and fair value hierarchy that reflects the significance of the inputs used in making the measurements of fair value hierarchy has the following IFRS 13 'Fair Value Measurement' requires the company to classify fair value

Level 1 Level 2 Level 3

Quoted prices (unablished) in active markets for identical assets or liabilities.

Inputs other than quoted prices included vithin level. I than are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). Imputs for the asset or liability than are not based on observable market data (i.e. unobservable) inputs.

Transfer between levels of the fair value hierarchy are recognised at the end of the reporting period during which the changes have occurred.

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.
